LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2005-00352

Response to the First Set of Data Requests of KIUC Dated October 21, 2005

Question No. 14

Responding Witness: Kent W. Blake

- Q-14. Please explain conceptually why the Companies' adjustments to remove the effects of the FAC, ECR, and DSM are not revenue neutral (revenues equal expenses/costs)?
- A-14. Regulatory lag will always create a mismatch of revenues and expenses over a fixed twelve month period. These adjustments remove the booked revenues and expenses such that these separate adjustment mechanisms do not impact operating income during the twelve month period.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2005-00352

Response to the First Set of Data Requests of KIUC Dated October 21, 2005

Question No. 15

Responding Witness: Kent W. Blake

- Q-15. Please provide a reconciliation of the per books FAC, ECR, and DSM revenues and expenses/costs.
- A-15. FAC: Per-books fuel costs, purchased power expenses, and off-system sales revenues are detailed on the attached spreadsheet. Included in the detail are the ratemaking adjustments that are required to conform with the Commission's FAC regulations. These ratemaking adjustments include the following:

Fuel expense is reduced to exclude non-jurisdictional coal and fuel oil burned at Trimble County Unit 1, and to exclude to the extent required by regulations, actual fuel expense incurred as a result of a forced outage greater than six hours.

Purchased power expense as recorded in LG&E's general ledger is reduced by demand charges, other non-fuel charges (generally charges associated with scrubber consumables), purchased power expenses incurred as a result of a forced outage greater than six hours (when the expense results in higher overall fuel expense than would otherwise have been incurred), and the cost of purchase power that exceeds LG&E highest cost source of internal generation.

Off-system sales revenues as recorded in LG&E's general ledger are reduced by any demand component and by margins. Off-system sales revenues are increased by dollars assigned to inter-system sales losses.

Finally, fuel expense is adjusted for prior period over or under collection of recoverable FAC fuel expenses.

For these reasons, fuel expense as defined for FAC purposes is not identifiable on the Company's books.

ECR: A summary of monthly environmental rate base and expenses, with ratemaking adjustments, is included on the attached spreadsheets.

Environmental cost recovery consists of two parts: a return on eligible rate base and a return of actual eligible expenses. LG&E's eligible environmental rate base items and expense amounts are included in the Company's general ledger. Eligible environmental rate base and expense amounts are tracked within the general ledger using a combination of account, location, and project details. Further, required ratemaking adjustments to eligible environmental rate base and expense amounts include exclusions for amounts separately recovered through base rates. For these reasons, ECR expenses/costs are not identifiable on the Company's books.

To the extent that monthly ECR revenues exceed or fall short of allowed ECR recovery, the over/under collected amount is included as an adjustment to the determination of subsequent allowed monthly recovery. A summary of monthly environmental rate base and expenses, with ratemaking adjustments, is included on the attached spreadsheets.

DSM: All expenses incurred in the operation of LG&E's DSM program are recoverable through the DSM tariff. There are no ratemaking adjustments to either expenses or revenues. Any mismatch between revenue and expense is due to differences between planned and actual expenditures or kWh variances, and the differences are included in the annual DSM balancing adjustment filed with the Commission at the end of the first quarter of each calendar year. The most recent balancing adjustment was filed on March 4, 2005 and is attached.

RE: Adjustments to Demand Side Management Balance Adjustment Component (DBA) of the Demand-Side Management Cost Recovery Mechanism for Louisville Gas and Electric Company

Dear Ms. O'Donnell:

Louisville Gas and Electric Company ("LG&E") files herewith an original and four copies of the following revised sheets of LG&E Tariff PSC of Ky. Electric No. 6:

Fifth Revision of Original Sheet No. 1 Second Revision of Original Sheet No. 71.4 Second Revision of Original Sheet No. 71.5

These revisions reflect adjustments to the DSM Balance Adjustment Component (DBA) of LG&E's Demand Side Management Cost Recovery Mechanism to reflect over- and under-recoveries experienced in the 12-month period of January 1, 2004 through December 31, 2004. An original and four copies of the supporting data for the adjustments are also filed herewith.

Sincerely.

Robert M. Conroy Manager, Rates

Med m/C

LOUISVILLE GAS & ELECTRIC COMPANY

DSM Balance Adjustment (DBA) 12-Month Period Beginning April 1, 2005

The Demand-Side Management Cost Recovery Mechanism (DSMRM) includes a provision for the recovery of demand-side management (DSM) program and administrative costs. The DSMRM further provides a balancing mechanism for reconciling differences in the costs recovered through the DSMRM and actual DSM expenditures. Interest at a rate equal to the average of the "3-Month Commercial Paper Rate" for the immediately preceding 12-month period is applied to any over- or under-recovery of revenues as part of the adjustment. The interest is applied monthly to the average balance of the cumulative net (over-) under-recovery revenues.

DSM Balance Adjustment (DBA)
For Residential Rate RS
12-Month Period Beginning April 1, 2005

The Demand-Side Management Cost Recovery Mechanism (DSMRM) includes a provision for the recovery of demand-side management (DSM) program and administrative costs. The DSMRM further provides a balancing mechanism for reconciling differences in the costs recovered through the DSMRM and actual DSM expenditures. Interest at a rate equal to the average of the "3-Month Commercial Paper Rate" for the immediately preceding 12-month period is applied to any over- or under-recovery of revenues as part of the adjustment. The interest is applied monthly to the average balance of the cumulative net (over-) under-recovery revenues.

The outcome of the interest calculations is an over-recovery of revenue with interest in the amount of \$829,149 during the period of January 1, 2004 though December 31, 2004, as shown on Exhibit DE Page 2 of 12. The DBA adjustments are then divided by the estimated billing determinants for the 12-month period from April 1, 2005 through March 31, 2006 in order to compute the per-unit DBA charge or credit. The resulting DBA factor for Residential Rate RS is (0.021) ¢ per kWh.

DSM Balance Adjustment (DBA)
For Large Commercial Rate LC
12-Month Period Beginning April 1, 2005

The Demand-Side Management Cost Recovery Mechanism (DSMRM) includes a provision for the recovery of demand-side management (DSM) program and administrative costs. The DSMRM further provides a balancing mechanism for reconciling differences in the costs recovered through the DSMRM and actual DSM expenditures. Interest at a rate equal to the average of the "3-Month Commercial Paper Rate" for the immediately preceding 12-month period is applied to any over- or under-recovery of revenues as part of the adjustment. The interest is applied monthly to the average balance of the cumulative net (over-) under-recovery revenues.

The outcome of the interest calculations is an over-recovery of revenue with interest in the amount of \$88,290 during the period of January 1, 2004 though December 31, 2004, as shown on Exhibit DE Page 2 of 12. The DBA adjustments are then divided by the estimated billing determinants for the 12-month period from April 1, 2005 through March 31, 2006 in order to compute the per-unit DBA charge or credit. The resulting DBA factor for Large Commercial Rate LC is (0.004) ¢ per kWh.

RE: Adjustments to Demand Side Management Balance Adjustment Component (DBA) of the Demand-Side Management Cost Recovery Mechanism for Louisville Gas and Electric Company

Dear Ms. O'Donnell:

Louisville Gas and Electric Company ("LG&E") files herewith an original and four copies of the following revised sheets of LG&E Tariff PSC of Ky. Gas No. 6:

Sixth Revision of Original Sheet No. 1 Second Revision of Original Sheet No. 71.3

These revisions reflect adjustments to the DSM Balance Adjustment Component (DBA) of LG&E's Demand Side Management Cost Recovery Mechanism to reflect over- and under-recoveries experienced in the 12-month period of January 1, 2004 through December 31, 2004. An original and four copies of the supporting data for the adjustments are also filed herewith.

Sincerely,

Robert M. Conroy Manager, Rates

Enclosures

LOUISVILLE GAS & ELECTRIC COMPANY

DSM Balance Adjustment (DBA) 12-Month Period Beginning April 1, 2005

The Demand-Side Management Cost Recovery Mechanism (DSMRM) includes a provision for the recovery of demand-side management (DSM) program and administrative costs. The DSMRM further provides a balancing mechanism for reconciling differences in the costs recovered through the DSMRM and actual DSM expenditures. Interest at a rate equal to the average of the "3-Month Commercial Paper Rate" for the immediately preceding 12-month period is applied to any over- or under-recovery of revenues as part of the adjustment. The interest is applied monthly to the average balance of the cumulative net (over-) under-recovery revenues.
